This catalog listing indicates the various imagery coverage used by the U.S. Department of Agriculture (USDA) from the 1950's to the present. It shows imagery used primarily by the Farm Service Agency (FSA) and the Natural Resources and Conservation Service (NRCS). For imagery years prior to our collection, please contact the National Archives & Records Administration at: carto@nara.gov

Coverage is listed alphabetically by state and county. A Federal Information Processing Standard (FIPS) numerical code was assigned to each county after July 1, 1971. The prior years of imagery were assigned an alpha code, shown in parenthesis. Visit the FIPS Index at:

<https://www.fpacbc.usda.gov/alphafips>

Most film imagery projects have composite digital indexes available and/or photo center point shape files for download upon request.

Standard delivery is via digital download. As of March 5, 2025, hard drive media delivery requests will no longer be accepted.

National Agriculture Imagery Program (NAIP) 2002 to present Compressed County Mosaics (CCM) are available for download from the [USDA Geospatial Data Gateway](#) by clicking on the NAIP Download tab. NAIP Quarter Quads (QQ) are in a GeoTIF format and available as indicated in the listing. CCMs are not available for 2002. The QQ and Seamline shape files are available upon request or most recent year for each state available for download at:

<https://www.fpacbc.usda.gov/geospatial-services/customer-services/naip-coverage-map>

We are currently scanning our film collection through 2009 and any years not yet scanned will require an additional fee. Contact our Customer Services team for ordering instructions, imagery catalogs (refer to glossary of terms on last page), and further details on available products at:
